

Classic⁺

Swedish Composite Windows

Designed and manufactured to withstand the demanding conditions of the Scandinavian west coast.

Aluminium & Timber Composite Windows

Westcoast windows, doors and sliding doors combine all the style of aluminium with all the warmth of wood, ensuring superior external weather resistance with a warmer feel indoors.

The combination of timber and aluminium, together with a tightly engineered construction, delivers maximum longevity, minimal maintenance, and a refined appearance – inside and out.

EXCEPTIONAL ENERGY PERFORMANCE

Our triple-glazed windows and doors offer excellent thermal performance, keeping the heat in and your energy costs down. We offer a wide range of glazing options, including sound insulation, solar control and fire safety.

MADE TO MEASURE, BESPOKE DESIGN

Every window is produced to order in our Swedish factory, giving you complete freedom to choose the shape, style and colour. Visit our website to view all the opening options.

LOW MAINTENANCE, LONG LASTING EXTERIOR

The durable powder-coated aluminium exterior never needs painting, keeping it looking good for years to come.

HIGHEST-QUALITY PINE

Slow-grown, sustainably-sourced knot-free pine is used for the construction as standard, with oak or other species available at an additional cost.

COLOUR & FINISHES

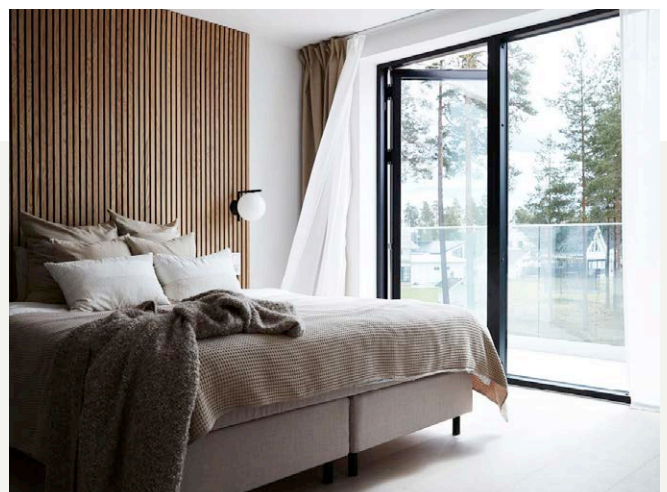

Our windows and doors are available in a wide range of colours and finishes to suit your home (see overleaf for options).

COMPOSITE DOORS

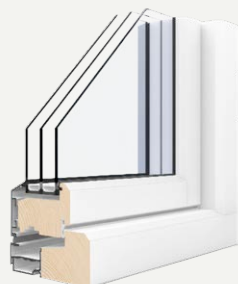

Complement your windows with single or double terrace/patio doors.

10 YEAR GUARANTEE

All Westcoast products have a 10 year guarantee as standard.

Aluminium Exterior

Warm Wood Interior

Sliding Doors

Swedish Composite Windows

Bring the outside in and create a seamless flow between your indoor and outside spaces.

Single or Bi-Parting Double Sliding Doors

Composite sliding doors make the best possible use of daylight to increase the natural light into your home, with large glazing panels up to 6 metres wide and 2.4 metres high.

The doors feature a unique combination of aluminium on the outside and timber on the inside. This ensures a long life with minimal maintenance.

EASY TO OPEN

With the lift and slide action, when the handle is turned the door panel lifts slightly, allowing it to glide smoothly sideways. This makes the door easy to operate, despite its substantial build quality.

SINGLE OR BI-PARTING

The sliding doors are available with a single sliding panel (SDA) or two sliding panels (SDC). All timber components are finished with environmentally friendly, water-based paint and manufactured from sustainably-sourced, knot-free timber. The threshold on our sliding doors is made entirely from oak, for a warm, welcoming feel.

KEEP THE WARMTH IN

Thermal performance is excellent, with triple glazing achieving a U-value of 1.0. Optional upgrades include patterned, acoustic and solar control glass.

SECURITY

Windows and doors are PAS24 tested and 'Secured by Design' certified.

Visit our website for more information and to view opening styles and case studies: www.westcoastwindows.com

External Aluminium Finishes

A range of 10 RAL colours are available as standard. Other colours can be supplied on request at an additional cost.
